

Expense Tracker - Project Report

Project Overview

Expense Tracker is a web-based application developed to help users record, manage, and analyze daily expenses. The system provides a simple interface for tracking financial activities and monitoring spending habits.

Objectives

- Track income and expenses efficiently.
- Maintain organized financial records.
- Provide real-time expense summaries.
- Improve personal budget management.

Technologies Used

HTML, CSS, JavaScript, Local Storage, and Responsive Web Design techniques.

Key Features

- Add, edit, and delete expense records.
- Categorize transactions.
- Display total income, expenses, and balance.
- User-friendly and responsive interface.

Conclusion

The Expense Tracker project demonstrates practical web development skills while providing a useful solution for personal finance management. It is lightweight, easy to use, and suitable for academic and learning purposes.
